Dear Deveena

Response to SCC placemaking proposals - the views of Compton village

As chairman of Compton Parish Council, I wanted you to see the enclosed report which sets out the village's collective response to SCC's placemaking proposals.

The Parish Council convened a village meeting to discuss the proposals for the village, led by William Bagnall and our traffic sub-committee who have, as you may be aware, been working on the issue for many years. Some 80 members of the village were present, representing a good cross section of the community. While we realise you need to see individual responses to the proposals, we believe it is important for you also to see our community response.

Although we would all in theory prefer the Average Speed Cameras option, which would take away so many of the contentious aspects of the placemaking plans, we are grateful for the efforts of SCC after many years of lobbying, and look forward to the speedy finalisation and implementation of the plans.

I hope the enclosed is self-explanatory, but please feel free to contact me or William Bagnall if there are any questions, or for any clarifications you require.

Yours sincerely,

Stephen Mallet
Chairman

Cc: Jessica Bramley, William Bagnall, Joanna Cadman
